It is generally considered that modern neurology was born in the 19th century, which was a period of rapid development of various branches of knowledge. However, it should be noted that neurology of diseases and changes of such diseases have been described since ancient times. Examples include the descriptions of neurological diseases and symptoms in ancient Egyptian papyri and other in the works of Hippocrates - often referred to as the Father of Medicine.

Anatomy of the man. The figure from the manuscript „Anatomia Completa” from the 14th century written by Tomasz of Wroclaw (1297-1378) – surgeon of Silesian dukes. Photograph from the website http://www.medycynapolska.eu/default_005.html

- The history of Polish neurology can be divided into several periods:
- the period from the 14th century to the 17th century, when the first anatomical drawings were made
 - the period of the greatest development of neurology from the middle of the 18th century to the 19th century
 - the 20th century
 - the period of modern neurology - from the end of the 19th century to the present

Stefan Falinski's in the book „On herbs and their potency” published in 1534 recommended the cupping therapy also in neurological diseases. The figure shows the places of the cupping therapy.

The first Polish neurology textbook was the manuscript „Anatomia Completa” from the 14th century written by Tomasz of Wroclaw (1297-1378) – surgeon of Silesian dukes. The manuscript was published in 1534. The first Polish neurology textbook was the manuscript „Anatomia Completa” from the 14th century written by Tomasz of Wroclaw (1297-1378) – surgeon of Silesian dukes. The manuscript was published in 1534.

Cover page of the book „Przemiót” by Wojciech Drużba, published in 1581, in which the neurological symptoms of syphilis have been described.

For centuries, syphilis also caused the effects of neurological diseases, which may be seen during neurological diseases. The first Polish neurology textbook was the manuscript „Anatomia Completa” from the 14th century written by Tomasz of Wroclaw (1297-1378) – surgeon of Silesian dukes. The manuscript was published in 1534.
